## LOUNGE SOFA

Majlis takes its name from a traditional space used in Arab countries, dedicated to hospitality and conviviality. It is a modular seating system designed for outdoor use, featuring generous dimensions, soft curves and exceptional comfort, recalling simplicity and connection to nature embraced by desert nomads.

Majlis on Structure features a generously sized seat cushion, surrounded by two distinct rolls serving as the backrest, crafted in varying sizes and densities for optimal comfort. Majlis on Structure is available in two heights, on a low base (B1) or a high base (B2). It is designed for versatility, with modules that can be arranged in multiple configurations to suit any space.

### Structure (1)

The structure features an aluminium counterframe, finished with powder paints that are resistant to atmospheric agents. The structure includes an iroko wood frame, treated with water-based oil for enhanced

protection against UVA rays and to ensure colour uniformity. The feet are made of iroko wood and equipped with thermoplastic tips.

### Seat Cushion (2)

The cushion inserts, specifically engineered for superior comfort and performance, are composed of a blend of non-deformable polyurethanes in different densities to enhance firmness and support, covered by a polyester fiber net.

### Back Cushions (3)

The backrest consists of two rolls made from non-deformable polyurethane foam, selected in varying densities and diameters

to conform to any ergonomic needs. The precise curvature of each roll is achieved through a polyurethane moulding process ensuring a perfect blend of design, comfort, and support.

### Fabrics

The external covers suitable for outdoor use, are removable and washable, offering ease of maintenance. The underside of the seat cushion is integrated with a non-slip fabric, ensuring anchorage to the structure and breathability. The cushion inserts are encased in a breathable, waterproof fabric, which enhances the cushions outdoor functionality and longevity.
