Lab Mirror L

The Lab mirror collection stands out for its use of irregular shapes, guided by dynamic lines that generate unexpected geometries. Crafted with lacquered wooden frames, the collection is available in combinations of matte and gloss lacquers, allowing for modulation of reflections, depth, and interaction with light. Another distinctive detail is the gap between the frame and the glass, which fragments the reflection and invites us to observe the surrounding space with new eyes. The Labs collection is born from the dialogue between perception and architecture, transforming the mirror from a simple functional element into an object capable of amplifying the rhythm, movement, and atmosphere of a space.

Technical Details

MDF, hand finished, pores sealed, sandblasted and lacquered. Embedded steel mounting structure. Extra-clear glass mirror. Comes assembled.
